

## **Budding Growth In The Healthcare Revenue Cycle Arena**

*MediStreams, a technical provider of healthcare revenue cycle management solutions cites new business growth and opportunities due in part to partnership with valued BPO vendor DDC USA*

ATLANTA, GA ([PRWEB](#)) July 25, 2017 -- MediStreams, a developer of revenue cycle management solutions for healthcare providers, reported a surge in business growth with the recent roll-out of their newest line of billing solutions that streamlines and increases revenue flow in the healthcare arena. The seamless expansion of their solution line was made possible in part, to their valued vendor partnership with onshore BPO provider DDC USA.

"Trustworthiness is the biggest factor in our relationship with our vendors," cited John A. Koch, COO of MediStreams. "In an industry where accuracy and quick turnaround times are critical for us, we are pleased to partner with DDC USA who have and continue to assist us in our growing platform of solutions that we provide our healthcare clients."

MediStreams' line of healthcare billing products include Paper EOB Conversion, EOB Lite, Patient Payment Processing, Medical Lockbox and ERA Processing. In an industry heavily defined by U.S. government regulations, medical payment information takes a burdensome toll on insurance companies and healthcare providers who must maintain onshore, quick and accurate billing records.

Over the past nine years, MediStreams has stepped to the forefront alleviating the challenging tasks associated with healthcare billing into a streamlined, cost-efficient and highly accurate system.

James T. Coyle, Jr., CEO of MediStreams stated that, "Our vendor partnership with DDC USA enables MediStreams to deliver timely and accurate results to our healthcare provider clients. Our technology, combined with the excellent human data perfection services at DDC USA, gives MediStreams the edge in the Healthcare Revenue Cycle space."

Art Zipkin, President of DDC USA noted, "We are pleased to be a contributing partner for MediStreams to expand their excellent platform of solutions in the healthcare field. We look forward to continuing our partnership in the years to come."
